By the help of two following Tables, you may readily find the time of full Sea, or High-water at any of the Havens under-named, without any notable error: Except the Moons latitude, Land-polls, contrary Winds, &c. somewhat alter the time: The first sheweth the names of certain Havens, the point of the Compass whereunto the Moon coming, maketh High-water.

Of the Eclipses this Year; 1674.

THere will be five Eclipses, three of the Sun, and two of the Moon this Year, of which those of the Moon only, will be visible to us of Kings-Lyn. The first of the Moon will be upon the 12. of January, at near half an hour after five in the Morning, it will be a considerable Eclipse, and will be visible to us. The second Eclipse will be of the Sun, on the 26. of January, 39 Minutes after eight at night, at which time the Sun (to us) is under the Horizon, and so the Eclipse cannot be seen here. The third Eclipse is of the Moon, on the 7. of January, at a little more then half an hour after eight at night will be the greatest darkness, for the Moon will rise, she being Eclipsed. The fourth Eclipse will be of the Sun, on the 23. of July, about two in the morning, the Sun then being not risen hinders the sight thereof from us. The last Eclipse will be of the Sun also, on the 17. of December, at a quarter of an hour past seven in the morning, the Sun being then under the Horizon, the Eclipse cannot be seen.

A description of the four quarters of the Year.

Spring begins March 19. about 9. in the morning.

Summer begins June 11. about 4. in the morning.

Autumn begins September 12 about midnight.

Winter begins Decem. 11. about 11. before noon.

Rules concerning Husbandry.

When you would Plant or Graft, consider where the wind bloweth, if it be in the South it is very good for that purpose, but if it be North or East it is not good.

It is good to plant or graft generally the Moon increasing in these signs, Taurus or Aquarius, in the beginning of the Spring, or latter end of Harvest.

Plant trees for continuance, when the Moon is in Taurus Leo, or Aquarius.

Cut timber to have it sound in December or January, in
the

the wane of the Moon in Aquarius or Pisces.

Prune trees and pull off the mois in the month of Febr.

Plash hedges, and Lop trees for Fewel, that the heads may the sooner grow again, when the Moon is in Aries or Libra, and in her increase.

Set young Quicksets from September to March.

Remove young Trees in the last quarter of the Moon, when she is in Aries, Libra, Scorpio; and in these Moneths, September, November, February.

Set Vines in February, March or September, especially the Moon in Aries, Libra, Scorpio, in her increase.

Set Rose trees in the midst of February, the Moon increasing.

Cut or prune trees in March or April, the Moon in Taurus, Virgo or Capricorn.

Gather fruit, as Apples, Pears, and the like, at the full Moon the afternoon, the weather being fair and dry.

Cut down Hay presently after the full of the Moon.

Dung ground to prevent growing of weeds, the Moon decreasing.

Sow Carrot-seeds about the end of February, or the beginning of March, the Moon increasing. Also sow Onions, and Leeks in February or March, at the wane of the Moon.

Sow Cucumbers and Millions in February or March, or June, in a hot and fair day.

Sow Parsley, Fennel, and Anniseed, in February or March, at the full of the Moon.

Sow Marjorum, Violets, Time, Rosemary, and Lavender, in February, March, or April, in the increase of the Moon.

Sow Gillsflowers and Wall-flowers in March or April, in the old of the Moon.

Sow Hyssop and Savory in March, when the Moon is old.

Sow double Marigolds in February or March, in the increase of the Moon.

Shear Sheep at the increase of the Moon.

The best time to Geld cavel the Moon being in Aries, Sagittarius or Capricorn.

Of Blood-letting, and some other Physical
Observations.

In youth let blood from the change to the first quarter, in middle age, from the first quarter to the full. In elder years, from the full to the last quarter. In old age, from the last quarter to the change. But know that under the age of 14. and above the age of 56. it is not good to bleed at all.

Again, in the Canicular or Dog-days, it is very hurtful to take any Physick at all, unless there be great need; and indeed necessity hath no law: Wherefore in such a case, the disease being desperate, the cure must be advenured.

Take a purgation when the Moon is in Trine, or Fertile aspect with Venus, decreasing in any of these three Signs, Cancer, Scorpio, or Pisces, and it will be sure to work the better, because when a moyst Planet, in a moyst Sign hath such an aspect, the humours in the body are then stirred up and down, and so the better purged out; wherefore in this case, it cannot be amiss to prepare humours by something that is laxative: and let this be done whilst the Moon is either in Gemini, Libra, or Aquarius.

Take a vomit that it may work thoroughly, when the Moon is in Aries, Taurus, or Capricorn; and know that the aspects of the Moon with Saturn, or Mars, or the Moon in Leo, ought to be eschewed in the taking of Medicines.

Finally, if necessity urge no halt, these observations are expedient: for it is a plain truth, that the change of weather upon differing aspects, doth greatly change and alter mens bodies.
